DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 – 13 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: Regarding claims 1 and 8, it is unclear as to how the diffusion gradient is monitored. Does the diffusion occur across or along the recited transport axis in the channel? Is the reactive constituent added in a single input or along the length of the diffusion channel? The method appears incomplete with regards to the detection process. It is unclear as to how diffusion alone indicates biochemical activity. Is an assay required for the detection process?

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional cited prior art teach various diffusion-based detection systems.
